## Education

---

### R.K University, Rajkot

Bachelor of Technology

(B.tech) in Computer Science

CGPA: 7.44

July 2023 – May 2027

A motivated Pre-final year B.tech student passionate about full-stack development, seeking an entry-level WordPress Developer position at RTcamp. Eager to leverage my skills in JavaScript, React, PHP, and Node.js to contribute to innovative WordPress solutions while deepening expertise in WordPress theme/plugin development, headless architectures, and cloud-based deployments.

## Skills

---

**Languages:** Python, JavaScript, HTML/CSS, Dart, PHP

**Databases:** MySQL, MongoDB

**Web Technologies:** React, Node.js, Express.js

**Tools & Version Control:** VS Code, Android Studio, Git, GitHub

**Currently Learning:** Advanced WordPress Hook System, Headless

WordPress with React, AWS Deployment for WordPress

## Projects

---

### Supermarket APP | 🌐 [Github](#)

- **Tech Stack:** Node.js, Express.js, MongoDB (Mongoose), JWT, Multer.
- Engineered a comprehensive RESTful API for a dual-role E-commerce platform, facilitating distinct workflows for Customers (shopping, cart management) and Admins (inventory control, order fulfillment).
- Implemented secure Authentication & Authorization using JWT and bcrypt, ensuring protected routes for user profiles and admin dashboards.
- Developed a robust Shopping Cart system with persistent storage in MongoDB, supporting complex operations like quantity updates, item removal, and bulk clearing.
- Designed a scalable Database Schema to handle relational data between Users, Products, Orders, and Addresses, optimizing data retrieval for order history and category filtering.
- Integrated Multer for handling multipart form-data, enabling admins to upload and manage product images dynamically.

### Portfolio APP | 🌐 [Github](#) [Live](#)

- **Tech Stack:** Next.js, Tailwind CSS, Devicon, MagicUi, Typescript, React.
- Designed and developed a modern, minimalist personal portfolio to showcase my software development journey.
- Built with Next.js and TypeScript for performance and type safety.
- Styled with Tailwind CSS, and enhanced with MagicUI for smooth entrance animations and interactivity.
